CRM and Sales Analytics

This is a custom CRM and Sales Analytics applications developed for a client in India. It has almost all features of CRM plus a very Graphical Representation of Data in the form of Dashboards and repots. It is also integrated with SMS Gateway to schedule meetings and send direct meeting reminders to client, sales person and company management. The system has an added feature to track all correspondences like emails, minutes of meeting, summary and other highlights of any meeting with client. It keeps complete track of a conversation between client and company which can be printed with a click of a mouse

Digital Signage solution

Flairtek's Digital Signage solution is a multi-screen, multi-display, multi-zone, fully scheduled digital signage solution controlled from a centrally managed web interface. In general sense, digital signage is an electronically controlled signs that can be updated without any cost and expense of changing the physical sign itself. Digital signage is a form of advertising in which content and messages displayed on an electronic screen, or digital sign, can be changed without modification to the physical sign, typically with a goal of delivering targeted messages to specific locations at specific times. Most important is every individual location at every different interval of time can displays different information.
